LinkedIn · Fully remote, Americas region · Spanish (native), English (advanced)

Marketing student with genuine technical fluency, applying for the Graduate Partner Marketing Manager role in the Americas region. I have built and shipped three web products end to end with Claude Code: a marketing platform with 5 live tools on the Gemini API, an ecommerce analytics dashboard over a real public BigQuery (GA4) dataset, and a marketing news portal in Astro. All three run in production on Vercel, written in Next.js, Astro, TypeScript and Tailwind, two of them with Vitest test suites, and all three self-directed from idea to deployed URL. Alongside that I run daily CRM and customer operations at BBVA Argentina, guiding over 100 customers a week into the bank's app and online banking. I am still studying: my Licenciatura en Marketing at Universidad CAECE is in progress and I expect to graduate in December 2027. I have no open source, Linux or channel marketing experience yet; that is the domain your graduate programme teaches, and it is what I am here to learn.

Core Competencies

- **Technical fluency for a marketer**: I write TypeScript, write Vitest tests and deploy my own work. Three production web apps built with Claude Code (agentic development), each shipped to Vercel by me, with the Gemini API integrated in two of them. This is the bridge I offer to a developer-facing company.
- **Creative packaging, translating technical work into content**: my SEO optimizer fetches a real site, extracts its real title and meta description server-side, and only then asks Gemini for a diagnostic. Nothing verifiable is ever asked of the model. Vidriera, my marketing news portal, balances storytelling with data across 6 editorial categories.
- **The analytical thinker**: ecommerce dashboard over a real public BigQuery GA4 dataset that tracks outcomes with KPIs, trend charts and a daily executive summary cached in Redis. SQL at working level (module 5 of the Google Data Analytics Professional Certificate, BigQuery and Google Standard SQL), plus self-directed SQLite practice over marketing and CRM datasets. I want marketing decisions made on evidence, not intuition.
- **The relationship builder**: daily customer-facing work inside a bank, resolving over 50 queries a week with a retention focus rather than one-off transactions, and guiding over 100 customers a week through a change of banking channel they did not initiate.
- **The self-starter, remote-first ready**: three products in production, each one decided, built and deployed without a brief, a manager or a deadline, alongside a full-time job and a degree in progress.
- **Marketing basics, brand stewardship and demand generation**: 15 posts per month planned and published on Instagram and Facebook through Meta Business Suite across three summer seasons, holding a distinct brand voice for several local brands at once, and conversion-oriented content built to generate enquiries rather than reach. Retention, CRM and lifecycle marketing are my declared specialism.
- **Learning agenda**: open source, Linux and Ubuntu, partner and channel marketing, the enterprise software channel, B2B technology marketing and developer relations are all new to me. How I close a gap is the part I can evidence now: Klaviyo in active, self-directed learning, and the Google Data Analytics certificate at module 5, both while working and studying full time.
- **Communication**: advanced written and spoken English, native Spanish, a Diploma in Oral Communication and Rhetoric (UTN), and daily practice explaining systems to non-technical people.
- **Business technology and tools**: Claude Code, Next.js, Astro, TypeScript, Tailwind CSS, Vitest, Gemini API, BigQuery, Upstash Redis, Vercel, SQL, Google Sheets / Excel, banking CRM and internal systems, Meta Business Suite, Canva.

Professional Experience

- **BBVA Argentina** — **Mar del Plata, Argentina**
  Gestor Express (Customer Adviser) — *2026-Present*
  - Drive adoption of the bank's digital products: over 100 customers per week guided through migration to the mobile app and online banking.
  - Resolve over 50 customer queries per week, prioritising retention and customer experience.
  - Run daily operations on the bank's CRM and internal systems, keeping customer records and interaction history accurate.
  - Navigate the bank's internal systems and processes to get a customer case closed, inside a large and heavily regulated organisation.

- **Mar del Plata Digital** — **Mar del Plata, Argentina**
  Community Manager — *2023-2025*
  - Managed social media for local brands across three consecutive summer seasons (2023, 2024, 2025).
  - Planned and published 15 posts per month on Instagram and Facebook via Meta Business Suite, on a fixed monthly calendar.
  - Produced the visual content in Canva and wrote the copy for each brand's audience.

- **Inmobiliatica.com** — **Mar del Plata, Argentina**
  Digital Marketing Assistant — *2023-2025*
  - Supported the marketing team of an online real-estate platform with content and digital communications, held in parallel with the Community Manager role above.
  - Produced conversion-oriented content for lead generation: posts and promoted listings built to generate enquiries rather than passive reach, in a market with a long consideration cycle.

Independent Projects

- **AI Marketing Agency** (Claude Code) – production platform with 5 live tools on the Gemini API: copy generator, campaign-plan generator, competitor auditor, SEO optimizer and buyer-persona generator. Built on the rule that no verifiable fact is generated: domain, title and meta description are computed server-side, and the model is never asked what the code can confirm. Next.js, TypeScript, Tailwind, Vitest, Upstash Redis rate limiting shared across the five tools, Vercel. Live at agencia-marketing-ia-pi.vercel.app.
- **Marketing Analytics Dashboard** (Claude Code) – ecommerce analytics dashboard over a real public BigQuery (GA4) dataset, in three sections (Overview, Products, Audience): KPIs, trend charts and a daily executive summary generated with the Gemini API and cached in Redis, so the numbers reach the reader as a narrative rather than a wall of charts. Next.js, TypeScript, BigQuery, Recharts. Live at fase1-ga4-dashboard.vercel.app.
- **Vidriera** (Claude Code) – marketing news and explainer portal where I set the editorial line across 6 categories, from current campaigns and trends to brand failures, turning industry stories into content a non-specialist can follow. Astro, Tailwind CSS v4, TypeScript, Vitest. Live at vidriera-blush.vercel.app.

Education

- **Universidad CAECE** — **Mar del Plata, Argentina**
  Licenciatura en Marketing (Bachelor's Degree in Marketing) — *2024-2027*
  In progress, expected graduation December 2027.

- **Universidad Tecnológica Nacional (UTN)** — **Argentina**
  Diploma in Oral Communication and Rhetoric — *Aug 2025 - Dec 2025*
  Oral communication, rhetoric and public speaking.

Certifications

- **Google Data Analytics Professional Certificate** (in progress, module 5) – SQL and BigQuery, spreadsheets, data cleaning, visualisation and analysis.
- **Foundations: Data, Data, Everywhere** (Google) – completed.
