Marketing profile working at the point where campaigns meet data, applying for the Marketing Growth Analytics & Operations Intern role. I write my own SQL: I am on module 5 of the Google Data Analytics Professional Certificate (BigQuery and Google Standard SQL), with additional self-directed practice in SQLite over marketing and CRM datasets of customers, campaigns and purchases. I have also built and shipped a dashboard that queries a real public BigQuery GA4 ecommerce dataset and renders KPIs, trends and an AI-generated daily summary, built with Claude Code. On the operations side, I run daily CRM and internal-systems work at BBVA Argentina, a bank: over 50 queries a week with a retention focus and over 100 customers a week guided through digital-channel adoption. My focus is retention and lifecycle, with the success metric defined before the data is pulled rather than after. Experiment design and marketing-automation platforms such as Braze are the two parts of this role I would be learning on the job.

Core Competencies

- **SQL**: working knowledge of SQL for pulling and cross-checking campaign and customer data, built on module 5 of the Google Data Analytics Professional Certificate (BigQuery, Google Standard SQL) plus self-directed SQLite practice over marketing and CRM datasets (customers, campaigns, purchases).
- **Dashboards and reporting**: designed and shipped an ecommerce analytics dashboard on a real public BigQuery (GA4) dataset: KPI tracking, trend charts (Recharts), product and audience segment breakdowns, and a daily executive summary generated by the Gemini API. No BI tool in between; I scoped and built the reporting layer myself.
- **Marketing operations and CRM**, with a retention and lifecycle focus: daily ownership of operations on a banking CRM and internal systems, logging and resolving over 50 customer queries a week. Klaviyo in active, self-directed learning: email and CRM fundamentals, and building flows.
- **Adoption and activation**: over 100 customers a week guided through migration to the mobile app and online banking, the adoption side of the funnel that growth programs measure.
- **Getting the most out of AI**: Claude Code is how I build. Three independent web projects shipped with it, including two that integrate the Gemini API in production for first-pass analysis and generated summaries.
- **Deciding what gets built, then checking it**: on my own projects I decide what each tool has to do before it is built and then QA what ships, with Vitest covering the parts that matter. TypeScript, JavaScript and HTML/CSS in Next.js and Astro, enough to read a codebase and trace a data query through it. Drawn to the business and product side rather than engineering for its own sake.
- **Pace alongside commitments**: holding a full-time bank role while studying for the Marketing degree and the Google Data Analytics certificate, after three consecutive summer seasons publishing to a fixed content calendar. Short turnarounds and several inputs at once are the normal conditions, not the exception.
- **Communication**: advanced written and spoken English, Diploma in Oral Communication and Rhetoric (UTN), and daily practice explaining systems to non-technical customers.
- **Tools**: SQL, BigQuery, Google Sheets / Excel, Claude Code, Gemini API, Next.js, Astro, TypeScript, Recharts, banking CRM and internal systems, Meta Business Suite, Canva, Vercel.

Professional Experience

- **BBVA Argentina** — **Mar del Plata, Argentina**
  Gestor Express (Customer Adviser) — *2026-Present*
  - Run daily operations on the bank's CRM and internal systems, keeping customer records and interaction history accurate and correctly classified.
  - Resolve over 50 customer queries per week, prioritising retention and customer experience over one-off transactions.
  - Guide over 100 customers per week through adoption of the mobile app and online banking, the activation step behind every digital-channel metric.
  - Handle recurring operational queues against fixed criteria, where the same customer problems resurface week after week and the useful question is what is causing the repeats.

- **Mar del Plata Digital** — **Mar del Plata, Argentina**
  Community Manager — *2023-2025*
  - Managed social media for local brands across three consecutive summer seasons (2023, 2024, 2025).
  - Planned and published 15 posts per month on Instagram and Facebook (Meta Business Suite) on a fixed monthly calendar.
  - Produced visual content in Canva and wrote copy aligned to each brand's audience.
- **Inmobiliatica.com** — **Mar del Plata, Argentina**
  Digital Marketing Assistant — *2023-2025*
  - Supported the marketing team of an online real-estate platform with content and digital communications.
  - Produced conversion-oriented posts designed to generate enquiries rather than passive reach.

Independent Projects

- **Marketing Analytics Dashboard** (Claude Code) – ecommerce analytics dashboard over a real public BigQuery (GA4) dataset: KPIs, trend charts and a daily executive summary generated with the Gemini API, cached in Redis. Next.js, TypeScript, BigQuery, Recharts. Live.
- **AI Marketing Agency** (Claude Code) – production platform with 5 active tools (copy generator, campaign-plan generator, competitor auditor, SEO optimizer, buyer-persona generator) on the Gemini API, with Redis rate limiting shared across the tools. Next.js, TypeScript, Tailwind, Vitest, Vercel. Live.
- **Vidriera** (Claude Code) – marketing news portal organised in 6 editorial categories. Astro, Tailwind CSS, TypeScript. Live.

Education

- **Universidad CAECE** — **Mar del Plata, Argentina**
  Bachelor's Degree in Marketing — *2024-2027*
  In progress, expected completion Dec 2027. Currently studying, available for an internship schedule alongside coursework.
- **Universidad Tecnológica Nacional (UTN)** — **Argentina**
  Diploma in Oral Communication and Rhetoric — *2025*
  Aug 2025 - Dec 2025.

Certifications

- **Google Data Analytics Professional Certificate** (in progress, module 5) – SQL and BigQuery, spreadsheets, data cleaning, visualisation and analysis.
- **Foundations: Data, Data, Everywhere** (Google) – completed.
