Marketing professional specialising in CRM, email marketing and lifecycle marketing, with an execution-first way of working. At BBVA I run daily operations on the bank's CRM and internal systems and handle over 50 customer queries per week with a retention focus. Email and lifecycle marketing is the direction I have chosen deliberately: I am actively learning Klaviyo on my own initiative, working through its flows and email-marketing/CRM fundamentals, and studying for the Google Data Analytics Professional Certificate (SQL, spreadsheets, visualisation) so campaign decisions rest on data. Across three summer seasons as a Community Manager I owned a content calendar and published 15 posts per month on schedule, which is the same coordination discipline a campaign calendar needs. Spanish native, advanced English, fully remote and part-time.

Core Competencies

- **Email marketing, CRM & lifecycle**: chosen specialisation. Daily CRM operations with a retention focus; studying lifecycle flow logic, including welcome and abandoned-cart flows, as part of self-directed email-marketing training.
- **Klaviyo (email service provider)**: in active, self-directed learning; currently working through flows and email-marketing/CRM fundamentals in the platform.
- **Campaign calendar & scheduling**: owned and published a 15-posts-per-month content calendar across three consecutive seasons, scheduling every publish for its planned slot through Meta Business Suite and reviewing each one before it went live rather than after.
- **Audience & segmentation thinking**: SQL at intermediate level (BigQuery/Google Standard SQL) plus self-directed practice querying marketing and CRM datasets (customers, campaigns, purchases) to isolate the right audience for an action.
- **Design and build of visual content**: social and brand creative built and adapted in Canva, keeping every asset on-brand; basic Figma, self-taught.
- **Autonomous remote execution**: built and shipped three of my own web products with **Claude Code** (agentic development), including a production platform with five live AI marketing tools. Remote, unsupervised, delivered end to end.
- **Tools**: CRM and internal banking systems, Meta Business Suite, Canva, Google Sheets / Excel, SQL, Claude Code.
