Digital marketing profile with a data-driven foundation, based in Mar del Plata where DEPT has an office. At BBVA I run daily operations on the bank's CRM and resolve over 50 customer queries per week, work that depends on reading data correctly and explaining it to a customer in plain terms, which is close to the discipline of turning search and AI-visibility data into a client-facing recommendation. Three consecutive summer seasons as Community Manager gave me hands-on content-calendar execution across Instagram and Facebook. I am completing the Google Data Analytics Professional Certificate (SQL, spreadsheets, data visualisation), the analytical toolkit behind translating performance data into a narrative. I am upfront that I have not yet run technical SEO audits or managed tools such as Ahrefs, Semrush or Screaming Frog professionally; what I bring is a fast, proven learning curve, native comfort with client communication, and a genuine interest in how search is shifting toward AI-driven results.

Core Competencies

- **Data-informed client communication:** translates day-to-day CRM and operational data into plain-language guidance for customers at BBVA, the same bridge a Search Console or AI-tracking report needs to make for a client meeting.
- **Content & channel execution:** three summer seasons building and publishing content calendars on Instagram and Facebook via Meta Business Suite, coordinating with a Content/Creative-style workflow (Canva asset production, scheduling, performance review).
- **Reporting & analytics:** spreadsheets and Excel, SQL, and data visualisation from the Google Data Analytics Professional Certificate (in progress), applied to marketing metrics such as reach, engagement and enquiries generated.
- **Client-facing reliability:** detail-heavy, deadline-driven production work with zero tolerance for error, handling 50+ customer interactions per week at BBVA.
- **Communication & presentation:** advanced English for daily work with teams abroad; UTN diploma in Oral Communication and Rhetoric, built for clear meeting delivery and follow-ups.
- **Continuous learning:** currently combining a full-time bank role, an ongoing Marketing degree and a data analytics certificate, evidence of the ramp-up speed a technical-SEO and GEO learning curve would require.
