Client-facing marketing professional with daily experience across customer service, CRM operations, and digital content execution. At BBVA I act as a primary point of contact for banking clients, resolving over 50 inquiries per week and guiding more than 100 clients per week through onboarding to digital channels, while keeping CRM records accurate for tracking and reporting. Three consecutive seasons managing content calendars and campaigns for multiple local brand clients (Mar del Plata Digital) add practical experience juggling several accounts at once, plus hands-on Canva production and conversion-oriented copywriting. I am completing the Google Data Analytics Professional Certificate (SQL, spreadsheets, visualisation) to bring an evidence-based approach to performance tracking, and I am looking to apply this client-service and process-driven foundation to onboarding, reporting, and day-to-day account management for growing app brands.

Core Competencies

- **Client Communication & Service:** primary point of contact for banking clients at BBVA, resolving 50+ inquiries per week; adjacent, client-facing foundation for account management and client success work.
- **Client Onboarding & Follow-up:** guide clients through onboarding to new digital channels (100+ per week), with accurate CRM follow-up on every interaction.
- **Multi-Account Campaign Execution:** planned and delivered monthly content campaigns (15 posts/month) for several seasonal brand clients concurrently across Instagram and Facebook (Meta Business Suite), reviewing content for quality before it went live.
- **Data & Reporting** (in progress): SQL, spreadsheets and visualisation via the Google Data Analytics Professional Certificate; building toward campaign performance tracking and standardised reporting.
- **Tools:** CRM systems, Meta Business Suite (organic), Canva, Google Sheets / Excel, SQL. Meta Ads Manager and paid social reporting are a deliberate next step, building on organic content and CRM experience.
- **Process & Organisation:** daily operations on the bank's CRM and internal systems, keeping records accurate and complete for reliable tracking.
- **Languages:** Spanish (native), English (advanced).
