Dear Arcady Media hiring team,

I am writing about the Klaviyo Email Technician role. Executing lifecycle flows and campaigns under a Lifecycle Marketing Manager, then tying every send back to performance data, is exactly the working style I want: at BBVA I run daily operations on the bank's CRM with a clear focus on retention, and I am actively learning Klaviyo on my own right now to bring that focus into e-commerce lifecycle marketing.

Arcady Media's own positioning, "Grow profit. Not just clicks," and its Elite Master status in Klaviyo's partner directory are the kind of revenue-accountable, technically rigorous environment I want to build my Klaviyo skills in.

Here is how my background maps to what this role needs:

- Retention on CRM: I manage daily CRM operations and communicate directly with over 100 customers per week, prioritising retention and long-term customer relationships.
- Reading performance data: I am completing the Google Data Analytics Professional Certificate (SQL, spreadsheets, visualisation) and work comfortably in Excel and Google Sheets to compile and explain metrics such as engagement and repeat rate.
- Execution discipline and QA: across three seasons I planned content calendars, briefed and QA'd every piece of visual content before it went live, so nothing shipped off-brand or late.

The gap I want to name directly is time: this role calls for 2+ years dedicated to email marketing, CRM or retention marketing with strong hands-on Klaviyo experience, and my CRM and retention work so far, in banking, is under a year. What I bring to close that gap quickly is daily retention and CRM discipline, a data-analytics foundation that maps directly onto reading LTV and repeat-rate style reports, dependable execution and QA habits, and a self-driven learning curve already underway with Klaviyo's flows and fundamentals on my own initiative.

I would welcome the chance to bring that retention thinking, data discipline and execution habits to Arcady Media's clients, while continuing to build hands-on Klaviyo depth on the job.

I look forward to hearing from you.

Kind regards,

Bianca Dondero
