Dear Solvo Global hiring team,

I am writing about the Junior Paid Media & Marketing Automation Specialist role. My background is concentrated on the data, CRM and automation side of that mix: at BBVA Argentina I run daily operations on the bank's CRM, and I am actively building hands-on Klaviyo and SQL skills to support exactly the kind of segmentation and KPI analysis this role asks for.

Here is how my background maps to what you need:

- CRM platforms: daily, hands-on CRM operations at BBVA Argentina, resolving over 50 customer queries a week with a strict focus on data accuracy and retention.
- Email marketing & automation workflows: I am building hands-on Klaviyo skills right now (flows, email marketing fundamentals) through self-directed, active learning, directly aligned with the Klaviyo tool you list.
- Segmentation & KPI analysis: intermediate SQL, via the Google Data Analytics Professional Certificate, applied to segmenting customer data, building reports and reading performance metrics with evidence rather than intuition.
- AI tools for productivity: I built and shipped a marketing-automation platform with Claude Code, including a campaign-plan generator and an AI ad-copy generator, a generative-AI angle on automation that is adjacent to, not a substitute for, traditional email automation.

Solvo Global's nearshore model, connecting Latin American professionals with growing international teams, is exactly the kind of fully remote, global setup described in the posting, and Solvo's own emphasis on AI-powered tooling is familiar ground: I have already built and shipped automation tools with generative AI (Claude Code). It is the environment I am looking for: one where I can learn a specific marketing stack fast alongside people who already run it at scale.

I will be direct about fit. I have not yet managed paid Google Ads or Meta Ads campaigns professionally, and my digital marketing background (Community Manager and marketing assistant roles) sits outside a formal agency, even though it covered several brands' content calendars at once. What I bring instead is daily CRM discipline, a fast, self-directed learning curve already proven on Klaviyo and SQL, and automation experience from a different angle, generative AI, that I would apply to learning Google Ads, Meta Ads and the agency's automation stack quickly.

I look forward to hearing from you.

Kind regards,

Bianca Dondero
