Bilingual (Spanish/English) marketing professional focused on CRM, retention and lifecycle communication. At BBVA Argentina I work on the bank's CRM every day, keeping client records clean and accurate while guiding over 100 clients per week through digital channels, with retention and client experience as the explicit priority. Earlier, as Community Manager and digital marketing assistant, I planned and shipped content calendars and wrote conversion-oriented copy designed to generate enquiries rather than likes. I am detail-oriented, comfortable handling confidential client data, productive working independently and remotely, and I am completing the Google Data Analytics Professional Certificate (SQL, spreadsheets, data visualisation) so that reporting on open rates, click rates and conversions rests on evidence rather than intuition.

Core Competencies

- **CRM, data hygiene & segmentation:** daily hands-on work in a banking CRM, updating and correcting client records, logging interactions and grouping clients by profile and need; the same list-hygiene and segmentation discipline that keeps a marketing database usable.
- **Client journeys & lifecycle communication:** guide clients from first enquiry to resolution, with follow-up and reminders at each step; retention and client experience prioritised over one-off transactions. Email marketing and lifecycle automation are the areas I am deliberately building my career toward.
- **Multi-channel client communication:** daily client contact by phone, messaging and in person; content published across Instagram and Facebook (Meta Business Suite), adapting message and tone to each channel.
- **Conversion-oriented copy & testing:** wrote and iterated on campaign copy for local brands, testing alternative angles and messages, keeping what generated enquiries and dropping what did not.
- **Analytics & reporting:** SQL, spreadsheets, data visualisation and analysis applied to marketing metrics such as reach, engagement, open rate, click rate and conversion (Google Data Analytics Professional Certificate, in progress).
- **Privacy & attention to detail:** handle confidential banking data under strict internal controls, with over 50 client queries resolved per week and no margin for careless data entry.
- **Tools:** banking CRM and internal systems, Meta Business Suite, Canva, Google Sheets / Excel, SQL, Claude Code.
- **Languages:** Spanish (native) and English (advanced), used for study, certification and international collaboration.
