Dear MOREAN hiring team,

I am writing about the Growth Marketing Associate role. Morean's own model, AI-driven managed technology services built in Argentina for international clients, already runs on turning technical judgment into working systems rather than proposals. That is the same approach I bring to marketing: I design and ship AI-powered marketing tools with the Gemini API, end to end, using Claude Code.

I already practice that build-first approach outside of any job description, turning defined priorities into automated, AI-powered systems. Here is what I can put to work immediately:

- AI, built end to end: built and shipped two live products end to end with Claude Code and the Gemini API. One is five tools for acquisition, content and competitive intelligence: a copy generator, campaign-plan generator, competitor auditor, SEO optimizer and buyer-persona generator. The other pulls real BigQuery GA4 data and writes its own daily AI executive summary.
- CRM and retention discipline: daily hands-on CRM operations at BBVA Argentina, resolving over 50 customer queries a week with retention as the explicit priority, and guiding over 100 customers a week through activation onto digital channels.
- Data-driven foundation: completing the Google Data Analytics Professional Certificate (SQL, BigQuery), the same SQL skill set I am applying to the GA4 dashboard above.
- Campaign execution: owned seasonal campaign production for several local brands across three consecutive summer seasons as a Community Manager, scheduling content and using engagement data to decide what to repeat.

Two honest gaps: I have not yet held a dedicated growth or lifecycle marketing title. My closest experience is under a year of hands-on CRM and retention work at BBVA plus three seasons of community management, not the 2-3+ years in a growth or lifecycle role you are looking for, and I have not yet worked hands-on with Iterable, Smartly, Zapier, Clay, Framer or Lovable. What I can already show is the pattern those tools are meant to enable: turning a marketing idea into a working, AI-assisted system myself, rather than waiting to be handed the tool that does it.

Based in Mar del Plata, Argentina (GMT-3), fully remote and ready to join an international team.

I look forward to hearing from you.

Kind regards,

Bianca Dondero
