Marketing professional with hands-on CRM and customer-retention experience. At BBVA I run daily CRM operations and guide over 100 customers per week through digital-channel adoption, with retention as the core success metric, resolving more than 50 customer queries weekly. Across three consecutive summer seasons in social and content roles I planned monthly content calendars, published on Instagram and Facebook via Meta Business Suite, and wrote conversion-oriented copy for an online real-estate platform, judged by enquiries generated, not likes. I am completing the Google Data Analytics Professional Certificate (SQL, spreadsheets, data visualisation) to read lifecycle and campaign metrics with evidence. I have not yet run Shopify or Klaviyo in a professional ecommerce setting and would learn both on the job while contributing on CRM strategy, segmentation and retention analysis from day one.

Core Competencies

- **CRM & retention operations:** daily CRM management at a national bank, guiding 100+ customers per week through digital-channel adoption and resolving 50+ queries per week with retention as the explicit success measure.
- **Lifecycle & email marketing** (in training): grounded in the Google Data Analytics Professional Certificate and hands-on content/copy experience; no professional Klaviyo or Shopify ownership yet, disclosed honestly rather than implied.
- **Content & campaign execution:** three consecutive summer seasons building and running monthly content calendars, 15 posts per month across Instagram and Facebook via Meta Business Suite, adjusting angles season to season based on what drove engagement.
- **Conversion-oriented copy:** wrote posts for an online real-estate platform measured by leads generated, the same "does it convert" logic a lifecycle flow is judged on.
- **Data-driven decisions** (in progress): SQL, spreadsheets and data visualisation applied to marketing metrics, to move from intuition to evidence.
- **Tools:** Meta Business Suite, Canva, banking CRM systems, Google Sheets / Excel, SQL. Not yet used Shopify or Klaviyo professionally.
